Advanced Control Solutions are a business committed to one goal; to provide exemplary BMS, controls & commercial heating services to all its clients.

Based in Surrey and Hampshire, we are able to offer an affordable, reliable, and highly experienced service throughout the South-East of England, including London.

TAILORED BUILDING SERVICES SOLUTIONS THAT WORK FOR YOUR BUSINESS

“Our building services team are able to understand your requirements, and ultimately develop maintenance plans which compliment your existing systems...”

Founded in 1991, ACS provides mechanical, electrical and BMS solutions to clients throughout the South-East of England. We have a diverse range of clients and work within many different types of buildings; ranging from Schools, Hospitals and Government buildings, to warehouses, offices and large residential properties. Such buildings range in their requirements and setups, however our engineering and technical employees have large amounts of experience working with different systems and so are able to cope with the demands of a varying workplace.

Because we offer a complete “in house” M&E service, our teams work together to solve problems, and their capabilities & expertise constantly improves.

Whereas other providers of individual services will refer back to the client to resolve or subcontract additional labour, ACS deliver this service directly, saving clients time and money, whilst delivering an effective service.

Commercial Heating Services

Fully Gas Safe registered, ACS are specialists in commercial heating and gas services. We maintain, service and install all types of boiler (NG, LPG, Oil) from small individual systems, up to large scale, district heating for residential buildings.

BMS & Controls

Our Controls division design, install, commission, maintain and service a wide range of BMS Control Systems.

Basic controls to integrated BMS systems, ACS are industry experts with the ability to understand and solve your problems.

Complete M&E Solutions

ACS are a leading provider of mechanical, electrical and BMS services throughout the Southeast of England, with our commitment to the support of your business and our capability to deliver is second to none in the industry.

Online Service Scheduling
